

**Our Expertise | Leading the Industry for the Last 20 Years**

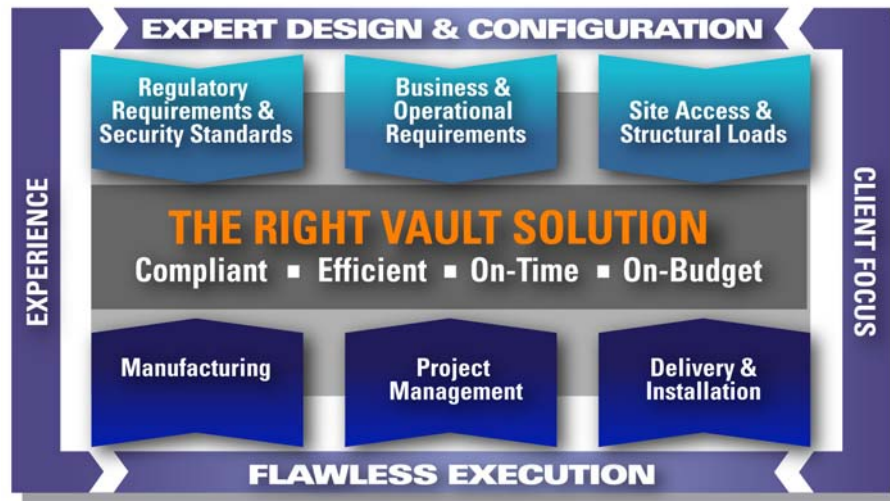

- MODULAR VAULTS
- VAULT DOORS
- WIRE WOVEN PARTITIONS
- FIRE & BURGLARY SAFES
- BULLET RESISTANT EQUIPMENT

**CustomVault is the leading provider of technologically advanced, high-security modular vault systems for pharmaceutical, government, armored car, jewelry and banking applications. Having invented the modular approach to vault manufacturing, CustomVault has been advancing the state of the art for over 20 years, installing thousands of GSA and UL listed vault systems around the world.**

**The Right Vault Solution for Any Application**

CustomVault provides an expert, consultative approach to the design, manufacture, delivery and assembly of modular vault solutions. With over 20 years of experience in providing modular vault solutions in every setting, our practiced approach ensures compliant, cost-effective delivery of the vault solution—all with the fastest turnaround in the industry. With practice groups devoted to Pharmaceutical, Government, Armored Car, Jewelry and Banking applications, we have a deep understanding of how our clients do business within a secure environment. This industry focus allows us deliver application-driven solutions that not only satisfy regulatory requirements, but also optimize operational efficiency.

**Expert Design & Configuration**

We analyze every project from all perspectives to recommend the solution that most efficiently satisfies security, business and site requirements:

- ▶ **Regulatory Requirements and Security Standards.** Our thorough understanding of regulatory, insurance and industry security standards ensures that design and configuration of the vault system is in compliance with all governing specifications. Proven process and manufacturing control and experienced installation teams ensure that the solution is delivered to those exacting standards. As the industry leader, we've even worked with government and insurance industry experts to draft many of the specifications that govern the industry today.
- ▶ **Business and Operational Requirements.** Our expertise extends well beyond our products to the business and operational requirements of the industry segments we serve. As a result, we are able to help clients improve productivity and lower the costs of operating in a secure environment. For example, our HighBay Vault™ system was specifically designed to meet high-volume, secure storage requirements of our pharmaceutical clients without compromise to the efficiency of their warehousing operations.

### Flawless Execution

Our unparalleled experience and expertise translates into total reliability for on-time and on-budget delivery of modular vault solutions against even the most aggressive time schedules.

- ▶ **Manufacturing Process Control.** State-of-the-art computerized process control ensures consistent quality and panels that conform to their listed rating. As the manufacturer, we have complete control over turnaround and can offer the lowest cost solution in our industry.
- ▶ **Project Management Expertise.** At the end of the day, expert project management is about solving problems before the client ever knows there is one.
  - ▶ **Coordinated.** We liaise with architects, general contractors and company facilities managers to ensure a smooth project flow and eliminate downstream surprises.
  - ▶ **No-Hassle Change Orders.** We are known for our flexibility in meeting existing construction schedules and for our rapid response to change orders.
- ▶ **Delivery and Installation.** Our attention to process and detail guarantees that what we design, we can deliver and install quickly, cleanly and professionally.
  - ▶ **Integrated logistics.** CustomVault manages an integrated logistic network that ensures rapid delivery of panels and doors to job sites in all 50 states and in dozens of countries worldwide.
  - ▶ **Expert, In-House Installation Teams.** CustomVault installation teams are expert in the rigging and installation of modular vault systems having managed thousands of vault installations in every conceivable construction environment.
  - ▶ **Minimal Disruption to Operations.** We pay special attention when planning the installation or expansion of the vault system to minimize the impact to ongoing operations.

### The CustomVault Advantage

For clients, our expertise translates into a modular vault solution that they can trust to be compliant and delivered at the lowest "all-in" cost—and one that optimizes the efficiency of their business operations within the secure environment.

### CustomVault Solutions

#### HighBay Vault™ Systems

DEA validated high-volume storage solutions that optimize secure warehousing operations by utilizing vertical space for pallet racking.

#### LightWeight Vault™ Systems

Laminate DEA/GSA/UL approved modular solutions that can be installed without heavy equipment for settings where access or structural load is an issue.

#### MegaVault™ Systems

Cost-effective, DEA/GSA or UL approved modular vaults for slab-on-grade settings.

#### MicroVault™ Systems

A cost-effective alternative to a traditional refrigerator safe, MicroVault™ is a small modular vault that provides step-in storage that can be installed right within the work environment. MicroVault™ is ideal for small lab settings where DEA validated secure storage is needed.

#### Security Equipment

CustomVault offers a complete line of wire woven partitions, safes and bullet resistant equipment for DEA/GSA/UL approved security installations.

#### Service Programs

Expert vault relocation, redesign and vault door repair and maintenance are available.

### About CustomVault

CustomVault was founded in 1984 and is now internationally recognized as **the expert** in the design and installation of complex, high-security modular vault solutions for United States government, pharmaceutical, jewelry, armored car and banking applications. Over 20 years ago we invented the modular approach to vault design and manufacture. Since then, we have been creating solutions that not only meet the high-security needs of our clients, but also innovate to work within the specific site and business requirements of the application. CustomVault, with clients in all 50 states and throughout North and South America, Europe, Asia and the Middle East, is headquartered in Bethel, CT.
