CustomVault

A Division of the CustomVault Corporation
4 RESEARCH DRIVE ■ BETHEL, CT 06801

www.customvault.com

CustomVault has over 25 years of experience and leadership in high-security modular vault systems and complementary solutions. We've created a center of excellence focused on the unique design and installation requirements of the jewelry and precious metals industry.

WE KNOW THE SPECIFICATIONS

Our team currently serves jewelry manufacturers/wholesalers, refiners, and casting companies throughout the US. We have extensive experience in working with both domestic and international insurance carriers who stipulate security standards for the industry worldwide.

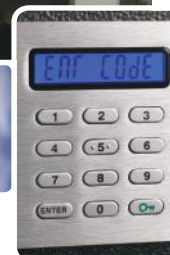

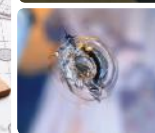

WE KNOW YOUR BUSINESS

CustomVault balances adherence to insurance requirements with cost efficiencies to minimize client investment. We respect the fact that the industry seeks to reduce all in cost without sacrificing the integrity of its security protocol. Furthermore, we successfully manage:

- High-Rise and Other Limited Access Conditions
- Structural Load and Site Preparation Challenges
- Aggressive Timetables
- Limiting Disruption to Existing Operations
- Integration with Current Systems (Conveyers, Sprinklers Etc)

WE ARE RESPONSIVE BY DESIGN

CustomVault offers a number of complements to our vault systems, including bullet resistant equipment and electronic security; both absolutely essential to the jewelry and precious metals industries today. We provide expert customization, collaborative design and professional, responsive project execution from inception to completion, proving that CustomVault is Responsive by Design.

LIGHTWEIGHT™ AND MEGAVault™ MODULAR VAULT SYSTEMS

CustomVault **LightWeight™** and **MegaVault™** Systems are standard height solutions constructed with either laminate or concrete panels, available with UL Class M, 1, 2 or 3 ratings.

LightWeight™ Systems are ideal for limited access assembly, whereas **MegaVault™** Systems are a cost-effective alternative where installation conditions allow for heavy equipment. Either option ensures complete customization to meet project requirements and the flexibility to accommodate relocation and expansion. CustomVault systems are purpose-built for the security and use requirements of jewelry and precious metals applications, and are complemented by UL approved vault doors that can accommodate conveyers and cart access. Notably, CustomVault also offers the **MicroVault™** as a cost-effective alternative to refrigerator safes.

WIRE CAGES

CustomVault designs and installs woven wire partition systems that are created to address project goals and accommodate available space. CustomVault Provides:

- Total cages or wall sections that anchor into existing concrete building walls, ceilings and floors. Built to any size, and any height wall or clear span ceiling up to 35'.
- Cage doors in a wide range of standard sizes or built to custom specifications.
- Full range of standard size self-closing, self-locking, hinged and sliding gates.
- TL-30, TR/TL-30 and TR/TL 30x6 safes available as a complement to systems.

BULLET RESISTANT EQUIPMENT

CustomVault configures and installs bullet resistant doors, glazing and curtain walls/panels; incorporating pass thru where required. Our bullet resistant solutions are fully customized AND are rated UL 752 1-7 as dictated by project requirements. Notably, CustomVault now specializes in mantraps and all-inclusive BR portals that integrate metal detectors.

ELECTRONIC SECURITY

CustomVault ensures clients a single point-of-contact for electronic security equipment needs by leveraging an extensive network of suppliers and benchmarking with the most advanced technologies. And all installations are guaranteed. CustomVault Provides:

- Video Surveillance Equipment
- Access Control Equipment
- Intrusion Alarm Equipment
- True Integration of Components for Optimal Protection
- Stellar After-Sales Service via Comprehensive In-house Network
- Remote/Mobile Facility Monitoring
