

## CannSecure Solutions from CustomVault We're Not Just Blowing Smoke

When it comes to controlled substance security, **CustomVault** is the industry expert. We have over 30 years of experience and leadership in pharmaceuticals, and have been offering solutions for the cannabis industry since 2009. We know what we are doing. Our security equipment goes far beyond vaults, and includes:

### BULLET RESISTANCE

Bullet resistance is something that every grower and dispensary should consider incorporating into their facility in order to ensure a safe environment for employees and site visitors. Integration into entry portals is the most common application for cannabis operations. To that end, **CustomVault** offers the following:

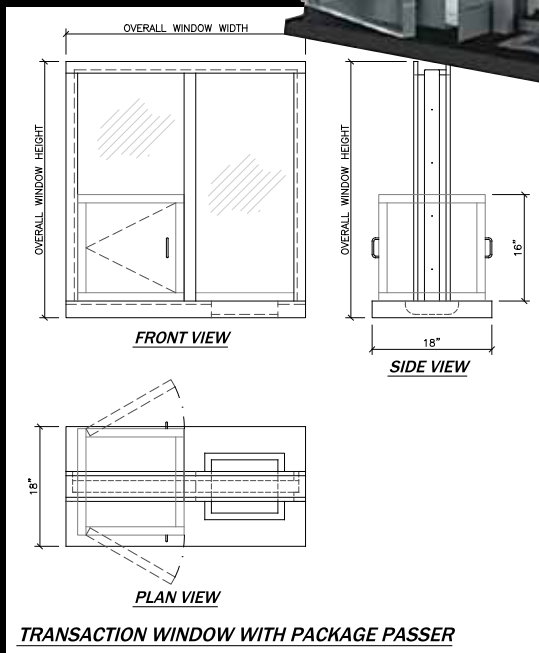

- Isotec safe-entry portals replete with metal detection and specifically designed for marijuana facilities. Recognized for their efficacy by the Department of Homeland Security, portals can be customized to meet architectural requirements and door openings. Isotec delivers:
  - UL Level I (9mm & .40 caliber) ballistic resistance
  - High Security doors with 10 year warranty

# CannSecure Solutions from CustomVault

- Bullet resistant windows with dip trays and package passers, as used in the armored car industry, and these have been adopted by cannabis facilities nationwide. **CustomVault** makes these available in multiple sizes to ensure that your facility is accommodated.

- Bullet resistant doors and drywall for fully customized mantraps from **CustomVault**. This is often used in both front entry areas and delivery areas for cannabis facilities.
