

Pharmaceutical Security Solutions from CustomVault

When it comes to pharmaceutical security, **CustomVault** is the industry expert. We have over 30 years of experience and leadership in Schedule I/II and III-V solutions. Our team is well-versed in the intricacies of 21 CFR 1301.72, the governing specification for pharmaceutical applications. Consequently, we have built hundreds of DEA validated vaults across the country for every major U.S. pharmaceutical manufacturer and distributor. But all vaults are not the same...

THE MEGAVALT™

CustomVault's MegaVault™ is fully compliant with DEA regulations; specifically 21 CFR 1301.72. The **MegaVault™** is a vault solution that:

- Utilizes heavier pre-cast concrete panels
- Requires heavy equipment and forklift access
- Is ideal for slab on grade applications

When manufacturers or distributors have clear access for installation in an existing facility or are building a new facility, the **MegaVault™** is an ideal solution. It provides the pharmaceutical facility with a controlled substance storage solution that is:

- **Cost-Effective.** Comprised of UL rated concrete panels, the **MegaVault™** system offers cost-effective, quick installation based on free-and-clear forklift access.
- **Compliant.** CustomVault's UL/DEA rated modular panels can be used to form the vault floor, walls, and ceiling for six-sided protection to meet any regulatory or industry security requirement. These are complemented by vault doors that adhere to regulatory standards.
- **Any Size or Shape.** Vault systems of any size and shape can be created for the project.

Note: All CustomVault vault systems are ready for HVAC.

All systems are custom-configured with appropriate port-vent panels as needed to allow for UL listed access for HVAC ducting and with the necessary conduit access to meet utility requirements.

THE LIGHTWEIGHT™ VAULT

CustomVault's LightWeight™ Vault is fully compliant with DEA regulations; specifically 21 CFR 1301.72. The **LightWeight™** is a vault solution that:

- Utilizes lighter weight composite panels
- Minimizes the impact on structural requirements
- Is ideal for sites with challenging forklift access

When manufacturers or distributors have challenging installations or floor loading issues in an existing facility, the **LightWeight™** is an ideal solution in that it can be installed virtually anywhere. It provides the pharmaceutical facility with a controlled substance storage solution that is:

- **Easy To Install.** Complemented by low-profile vault doors, **LightWeight™** panels are designed to install without heavy equipment. This solution accommodates freight elevators, stairs, above grade floors, and tight corners with fewer hang-ups. Ultimately, expedient installation ensures managed cost.
- **Compliant.** CustomVault's UL or GSA rated **LightWeight™** modular panels can be used to form the vault floor, walls and ceiling providing six-sided protection to meet any regulatory or industry security requirement.
- **Any Size or Shape.** Vault systems of any size and shape can be created for the project.

THE HIGHBAY™ VAULT

CustomVault's HighBay™ Vault is fully compliant with DEA regulations; specifically 21 CFR 1301.72. Especially designed to meet the requirements of the pharmaceutical segment, the **HighBay™** Vault system:

- Provides high-volume, high-security storage
- Leverages vertical space

With rapid fire controlled substance product introductions, both manufacturers and distributors find themselves scrambling to make the most of their existing footprint. **CustomVault** addresses the need for space optimization with the **HighBay™**. It provides the pharmaceutical facility with a controlled substance storage solution that is:

- **Compliant.** CustomVault's UL rated/DEA approved modular panels are used to form the vault floor, walls and ceiling for six-sided protection of controlled substance inventory; Schedule I and II.
- **Optimized for Warehousing.** This UL rated/DEA approved high-volume storage solution can be designed to accommodate multi-lane forklift patterns and the client's racking requirements.
- **Drive-Thru Doors.** CustomVault's **HighBay™ Vault** system utilizes specially designed oversized double-leaf vault doors to provide easy access for warehouse forklifts and pallet jacks, thereby optimizing functionality.
- **Any Size or Shape.** Vault systems of any size and shape can be created for the project.
